

Tree Spider™ Size Chart

Speed Harness and Speed Vest

	Size	S/M	L/XL	2XL/3XL
	Waist	26-34	34-42	42-50
	Torso	14-18	17-22	19 and up
	Height	4'10"-5'6"	5'5"-6'1"	5'9'-6'5

How to measure:

Waist: Measure at the naturally smallest place on torso, keeping the tape measure level.

Torso: Measure from the large bone at the base of your neck down your spine to the location that is level with the very top of your hip bone (the first bone you feel as you run your hand down your side after your ribcage).

Measurements overlap between size ranges as both waist circumference and height measurements are important on this product. Select the size that best fits your measurements.

If you plan to wear this product OVER a bulky outer jacket, measure your waist with the jacket on, or add 4-6 inches to your waist measurement to determine your size.

Livewire™ Descent System

	Size	Live20	Live30
	Weight	115-200 lbs	200-300 lbs
	Length	Up to 25 ft	Up to 25 ft

* The Livewire™ Descent System is only to be used with Tree Spider™ Speed Harness and Tree Spider™ Speed Vest. Use with other FAS devices is not recommended.

Treestrap	Vertical Climbing Belt
<ul style="list-style-type: none"> • 1 7/8" webbing strap • Easy to adjust steel buckle • Lightweight • One steel locking carabineer for attachment 	<ul style="list-style-type: none"> • 1 7/8" webbing strap • Web pull strap for one-handed adjustments • Rugged sewn loops at each end • Two steel locking carabineers for attachment

You will want your harness to be comfortable while climbing and sitting but never loose. Make sure it fits to the body without being constrictive. Be sure to follow the Instructions for Putting on and Fitting the Harness in the instruction manual before use.

To reduce your risk of injury or death from falls, you must read, watch, understand and follow all safety warnings and instructional materials included with this product.
